ANALYTIC SUBJECT INDEX

Angular momentum polarizations (see *Molecular flow*) **143A** (1987) 253
Ar–CF_4 mixture (see *Binary gas mixture*) **143A** (1987) 210
Argon, liquid
– The thermal conductivity of liquid argon - Calado et al. **143A** (1987) 314
Array of spherical scatterers, disordered
– Self-consistent cluster expansion for wave propagation and diffusion-controlled reactions in a random medium - Mattern and Felderhof **143A** (1987) 21
Array of spherical sinks, random
– Rate of diffusion-controlled reactions in a random array of spherical sinks - Mattern and Felderhof **143A** (1987) 1

Binary gas mixture
– A line shape induced by unlike-particle pairs in gas mixtures - Ben Saad et al. **143A** (1987) 210
Brownian motion
– Hydrodynamic interactions in Brownian dynamics. I. Periodic boundary conditions for computer simulations - Smith et al. **143A** (1987) 441

CH_4 (see *Molecular flow*) **143A** (1987) 253
Chiral clock model
– Low temperature renormalisation study of the— - Thijssen and Knops **143A** (1987) 147
Cluster expansion (see *Array of spherical scatterers, disordered*) **143A** (1987) 21
Cluster size distribution
– Are there infinitely many independent exponents in the percolation cluster numbers? - Stauffer and Coniglio **143A** (1987) 326
CO (see *Molecular flow*) **143A** (1987) 253
Coagulation
– A Monte Carlo simulation of— - Garcia et al. **143A** (1987) 535
Configuration mixing (see *Gd^{3+} in lanthanum ethylsulphate*) **143A** (1987) 331
Copolymer melts
– Dynamical theory of polymer melt morphology - Kawasaki and Sekimoto **143A** (1987) 349
Critical exponents (see *Cluster size distribution*) **143A** (1987) 326
Cubic anisotropy
– Exactly soluble model of phase transition with— - Plakida et al. **143A** (1987) 227

dc magnetic fields (see *Spin response, field-transverse*) **143A** (1987) 414
Density expansion (see *Diffusion-controlled reactions*) **143A** (1987) 1
Density fluctuations (see *Test particle in fluid*) **143A** (1987) 114
Density matrix (see *Dynamical systems*) **143A** (1987) 507
Density profiles (see *Wetting transitions*) **143A** (1987) 87
Diffusion-controlled reactions

– Rate of—in a random array of spherical sinks - Mattern and Felderhof **143A** (1987) 1
– Self-consistent cluster expansion for wave propagation and—in a random medium - Mattern and Felderhof **143A** (1987) 21
Dipole–induced-dipole approximation
– A line shape induced by unlike-particle pairs in gas mixtures - Ben Saad et al. **143A** (1987) 210
Dynamical systems
– Statistical mechanics of a large dynamical system interacting with an external time-dependent field: generalised correlation subdynamics - Coveney **143A** (1987) 507

Erratum
– — to Physica 140A (1987) 478, Domain growth in systems with multiple-degenerate ground states - Ohta et al. **143A** (1987) 346
Evaporation–condensation mechanism (see *Ostwald ripening*) **143A** (1987) 183
Evolution equations (see *Dynamical systems*) **143A** (1987) 507

Fermi liquids
– Field-transverse spin response of degenerate normal and neutral—in dc magnetic fields - Czerwonko **143A** (1987) 414
Fluctuations (see *Ostwald ripening*) **143A** (1987) 183

Gas–liquid transition
– A mean-field approach to the— - Maćkowiak **143A** (1987) 239
Gaussian–Markovian proces (see *Stochastic processes*) **143A** (1987) 468
Gd^{3+} in lanthanum ethylsulphate
– A study of effective crystal fields, spin–orbit coupling and residual interactions, due to relativistic effects and configuration mixing, for Gd^{3+} in C_{3h} symmetry - Tuszyński and Dixon **143A** (1987) 331
Generalized nonequilibrium statistical operator
– Derivation of the—from the extremum of the von Neumann entropy - Onyszkiewicz **143A** (1987) 287
Gold on sapphire (see *Polarizability of a sphere on a substrate*) **143A** (1987) 164
Green–Kubo formulas (see *Von Neumann entropy*) **143A** (1987) 287

Heat bath (see *Oscillator, quantum*) **143A** (1987) 547
Hydrodynamic interactions (see *Brownian motion*) **143A** (1987) 441

Instantons
– —in stochastic quantisation - Rouhani and Barton **143A** (1987) 220
Interface, liquid–gas
– Asymptotics of a free liquid–gas interface according to the non-local Van der Waals theory - Støvneng et al. **143A** (1987) 40
Interfacial motion (see *Polymer blends*) **143A** (1987) 349
Irreversible processes (see *Subdynamics*) **143A** (1987) 123

Landau parameters (see *Fermi liquids*) **143A** (1987) 414
Long time tails (see *Plasma, magnetized*) **143A** (1987) 494

Magnetic field effects (see *Molecular flow*) **143A** (1987) 253
Many-body system (see *Subdynamics*) **143A** (1987) 123
Markoff proces (see *Coagulation*) **143A** (1987) 535
Markoff proces (see *Stochastic processes*) **143A** (1987) 468

Migdal–Kadanoff renormalization (see *Chiral clock model*) **143A** (1987) 147
Mobility tensor (see *Brownian motion*) **143A** (1987) 441
Mode-coupling theory (see *Plasma, magnetized*) **143A** (1987) 494
Molecular flow
– Magnetic field effects on a—at Knudsen numbers of order unity for Co and CH_4 - van der Tol et al. **143A** (1987) 253
Momentum autocorrelation function (see *Oscillator, quantum*) **143A** (1987) 547
Monomer density (see *Polymer blends*) **143A** (1987) 349
Monte Carlo simulation (see *Coagulation*) **143A** (1987) 535
Morphology dynamics
– Dynamical theory of polymer melt morphology - Kawasaki and Sekimoto **143A** (1987) 349
Muon–spin depolarization (see *Resonance, low field*) **143A** (1987) 468

Oscillator, quantum
– The correlation function for a quantum oscillator in a low-temperature heat bath - Braun and Mello **143A** (1987) 547
Ostwald ripening
– Dynamics of fluctuations in—. A new equation of motion for the structure function - Tokuyama et al. **143A** (1987) 183

Percolation
– Are there infinitely many independent exponents in the—cluster numbers? - Stauffer and Coniglio **143A** (1987) 326
Periodic boundary conditions (see *Brownian motion*) **143A** (1987) 441
Phase diagram (see *Chiral clock model*) **143A** (1987) 147
Phase transition (see *Cubic anisotropy*) **143A** (1987) 227
Plasma, magnetized
– Interference effects in the long-time tail of the velocity autocorrelation function for a dense one-component plasma in a magnetic field - Suttorp and Schoolderman **143A** (1987) 494
Polarizability of a sphere on a substrate
– The polarizability of a truncated sphere on a substrate II - Wind et al. **143A** (1987) 164
Polyatomic gases
– On slip coefficents of— - ten Bosch et al. **143A** (1987) 261
Polymer blends
– Dynamical theory of polymer melt morphology - Kawasaki and Sekimoto **143A** (1987) 349

Quasiparticles (see *s–f model*) **143A** (1987) 296

Raman depolarization (see *Binary gas mixture*) **143A** (1987) 210
Rate coefficient (see *Diffusion-controlled reactions*) **143A** (1987) 1
Rayleigh depolarization (see *Binary gas mixture*) **143A** (1987) 210
Reptation model (see *Morphology dynamics*) **143A** (1987) 349
Resonance, low field
– Theory of low field resonance and relaxation I - Shibata and Sato **143A** (1987) 468

s–f model
– Accuracy of the spectral density approach for the quasiparticle excitations in the— - Nolting and Oleś **143A** (1987) 296
Slip coefficients
– On slip coefficents of polyatomic gases - ten Bosch et al. **143A** (1987) 261
Spectral density approach (see *s–f model*) **143A** (1987) 296

Spherical model (see *Cubic anisotropy*) **143A** (1987) 227
Spin correlation functions (see *Spin response, field-transverse*) **143A** (1987) 414
Spin response, field-transverse
– Field-transverse spin response of degenerate normal and neutral Fermi liquids in dc magnetic fields - Czerwonko **143A** (1987) 414
Stochastic dynamics (see *Test particle in fluid*) **143A** (1987) 114
Stochastic processes
– Theory of low field resonance and relaxation I - Shibata and Sato **143A** (1987) 468
Stochastic quantization
– Instantons in stochastic quantisation - Rouhani and Barton **143A** (1987) 220
Structure function (see *Ostwald ripening*) **143A** (1987) 183
Subdynamics
– —in the time-dependent formalism - Coveney **143A** (1987) 123
Subdynamics (see *Dynamical systems*) **143A** (1987) 507
Sullivan model
– A new generalization of the—for wetting transitions - Piasecki and Hauge **143A** (1987) 87
Sullivan model (see *Wetting transition*) **143A** (1987) 54
Surface free energy (see *Interface, liquid–gas*) **143A** (1987) 40

Test particle in fluid
– Stochastic dynamics of a—s with weak long-range forces - Piasecki and Szamel **143A** (1987) 114
Thermal conductivity (see *Argon, liquid*) **143A** (1987) 314
Three-dimensional model (see *Cubic anisotropy*) **143A** (1987) 227
Transient hot-wire technique (see *Argon, liquid*) **143A** (1987) 314
Transmittance (see *Polarizability of a sphere on a substrate*) **143A** (1987) 164
Tricritical point (see *Wetting transition*) **143A** (1987) 54

Van der Waals theory
– A mean-field approach to the gas–liquid transition - Maćkowiak **143A** (1987) 239
Van der Waals theory, non-local (see *Wetting transition*) **143A** (1987) 40
Van der Waals theory (see *Wetting transition*) **143A** (1987) 54
Van der Waals theory (see *Wetting transitions*) **143A** (1987) 87
Velocity autocorrelation function (see *Plasma, magnetized*) **143A** (1987) 494
Von Neumann entropy
– Derivation of the generalized nonequilibrium statistical operator from the extremum of the— - Onyszkiewicz **143A** (1987) 287

Wave propagation (see *Array of spherical scatterers, disordered*) **143A** (1987) 21
Wetting transition
– Asymptotics of a free liquid–gas interface according to the non-local Van der Waals theory - Støvneng et al. **143A** (1987) 40
– The dynamics approach to the—with short range forces - Ding and Hauge **143A** (1987) 54
Wetting transitions
– A new generalization of the Sullivan model for— - Piasecki and Hauge **143A** (1987) 87

Zero-field splitting (see Gd^{3+} *in lanthanum ethylsulphate*) **143A** (1987) 331
